2-DAY NATIONAL SEMINAR on INTEGRATING IT SECURITY IN BUSINESS OPERATIONS
Date: 08-12-2023 & 09-12-2023

About Seminar

Business Organisations function with an objective of profit, productivity and higher production with greater safety in the production process. Quality is also an objective for greater market share by bringing potential customer within the preview of existing customers in the competitive world.

Information Technology is a process and mechanism for the smooth functioning of the organisation in order to attain the objectives. Cyber-attack is a threat to business operations. IT security proactive is an approach to protect and safeguard the digital assets of an organisation. Security conscious minds of employees, employers and other stakeholders is a pre-requisite for the success of an organisation. Organisations require digital space for their functioning and promotions.

Sub Themes:

- **Security consciousness in the organisations.**
- **Cyber security technology to prevent cyber threats**
- **Cloud security solutions for customer information.**
- **Security assessment & Risk evaluation.**
- **Security culture and Organisational operations**
- **IT for managing business processes**
- **Regulatory Standards to ensure security procedures.**
- **Data Security using Artificial Intelligence in managing business operations.**
